

Secureworks[®]

Global Partner Program for Managed Security Services Providers

We've helped customers detect and respond to threats for more than 20 years. **Now that power is in your hands.**

Security teams of all sizes and maturity levels are struggling with larger attack surfaces, disparate tools, vulnerability management tasks and risks, and insufficient staff and skills. These days, threats move too fast for most organizations. In a recent survey by ESG¹, 76% of cybersecurity professionals have found that threat detection and response is more difficult than it was two years ago. Also, 89% of respondents said they plan to increase funding for threat detection and response activities.

According to Gartner², by 2025, 50% of organizations will be using MDR services for threat monitoring, detection and response functions that offer threat containment capabilities. Secureworks® is partnering with Managed Security Service Providers (MSSP) to help address and solve these challenges, and align with market direction and growth.

Secureworks enables partners to stand out in this changing market landscape.

“We believe our cloud-native security platform will unlock a revolution in cybersecurity and extending our leading capabilities through our MSSP partners will help us create a global security community that is a force for good.”

Ian Bancroft
Chief Revenue Officer
Secureworks

76%

of cybersecurity professionals have found that threat detection and response is more difficult than it was two years ago.

89%

of respondents said they plan to increase funding for threat detection and response activities.

50%

of organizations will be using MDR services for threat monitoring, detection and response functions.
