

# Secureworks<sup>®</sup>

Cyber Risk Partners

# Secureworks® provides a wide range of security solutions to help your clients prior to, during and after a breach.

A layered security approach is the best defense against a cyberattack. Secureworks provides incident response and proactive consulting services to help enable your clients to reduce risk and mature their cybersecurity posture, reduce impact during an incident, and continuously improve and build post-breach cyber resilience.

## **To Insurance Agencies:**

Minimize financial costs to your clients post breach while helping improve their security risk posture overall to reduce risk of future breaches.

## **To Law Firms:**

Improve client's security risk posture with advanced threat detection, streamlined investigations, and automated response actions.

You are one of the first calls clients make when a cybersecurity breach occurs – keep them one step ahead with Secureworks' Cyber Risk Program. Implementing a proactive security strategy will limit your clients' exposure to threat actors, minimize the duration and impact of an incident, and bolster their ability to respond quickly.

## Pre-Breach

For the past two decades Secureworks has been protecting global organizations from cyber threats by identifying gaps in their security operations and addressing those gaps with a mix of technology and services.
