

Security Event Monitoring

Evolve Your Ability to Detect, Prevent and Respond to Threats With Real-Time, Threat Intelligence-Driven Monitoring

Making Sense of a Mountain of Data

Clients need the right instrumentation, information and experience to combat today's cybersecurity threats. That sounds simple, but expanding your ability to prevent, detect and respond to cyber threats requires full visibility across your entire IT environment. Security personnel must often sift through a mountain of data in order to identify real threats and respond quickly and effectively. Most organizations do not have the budget, time, or expertise to maintain a finely tuned, 24x7 security program. The result is much less powerful than a proactive program that combines human and artificial intelligence to fortify an organization's infrastructure.

How Secureworks Helps

The Secureworks Security Event Monitoring solution provides clients with real-time monitoring, correlation and expert analysis of activity occurring in your environment. Powered by The Secureworks Counter Threat Platform™ (CTP), we help unify and simplify your security operations with a powerful combination of artificial and human intelligence.

Built upon billions of event data points, daily monitoring across 4,400 clients worldwide, and global threat visibility driven by The Secureworks Counter Threat Unit™ (CTU™) Research Team, our Security Event Monitoring solution allows clients to see more, know more and respond faster. We staff our Security Operations Centers (SOCs) with an elite team of researchers, analysts, engineers, and consultants who provide our clients with continuous investigation of real threats.

The Power of Holistic Threat Intelligence, Predictive Technology, Security Expertise

The Secureworks Security Event Monitoring solution is a holistic security program designed to help clients see more, know more and defend faster.

Our CTU actively monitors the dark corners of the internet, using hundreds of relationships with law enforcement and security entities, and the expertise of 70+ security researchers to maintain unmatched visibility into the ever-evolving threat landscape. Our CTU is routinely first to market with the latest threats and vulnerabilities solutions.

Client Benefits

- Unify visibility across your network, endpoints, applications and the cloud
- Reduce false positives and focus your time on what matters
- Maximize ROI on existing security investments and gain the freedom to invest in the best technology for your needs
- Close the skills gap for scarce security expertise
- Gain emerging Threat Intelligence with actionable guidance on how to remediate
- Automate event analysis with high fidelity detection through correlation and machine learning
- Access to customized reporting with flexible analysis and visualization tools

Our Counter Threat Platform uses machine intelligence, automated actions and orchestration to resolve more than 99.99 percent of events.

Our staff provide investigative, remediation and consultative support to clients on a 24x7 basis.

Our Client Portal provides the analytics to help clients understand risk, demonstrate compliance and develop unmatched visibility into their environment. And our mobile app provides this information on the go.

Why it Matters

Impactful, current intelligence:

Our CTP processes approximately 250 billion events daily across our client base and our CTU Research Team scours the Internet to give us a lens into the threat landscape across any technology, any industry, any environment, anywhere.

Protect systems and data 24x7 without increasing in-house headcount:

Secureworks provides around-the-clock monitoring of a client's infrastructure, eliminating the need to hire, train and retain qualified security personnel.

Unleash the value of your existing cybersecurity investments:

Our CTP can monitor virtually any technology capable of producing a log, including proprietary technologies, helping clients secure data.

Solution Features

- Vendor neutral platform for monitoring; ability to manage leading vendor technologies
- 24x7 monitoring leveraging artificial and human intelligence to detect threats with higher efficacy
- Powerful correlation with latest Threat Intelligence
- Unmatched visibility in the global threat landscape
- Deep reporting capabilities to demonstrate posture and compliance

About Secureworks

Secureworks® (NASDAQ: SCWX) is a leading global cybersecurity company that keeps organizations safe in a digitally connected world. We combine visibility from thousands of clients, aggregate and analyze data from any source, anywhere, to prevent security breaches, detect malicious activity in real time, respond rapidly, and predict emerging threats. We offer our clients a cyber-defense that is Collectively Smarter. Exponentially Safer.™
