

# Manufacturing Holes FOR HACKERS

40% of respondents said they do not incorporate IoT and connected products into the company's broader incident response plan.<sup>6</sup>

2nd most attacked industry in 2015.<sup>3</sup>

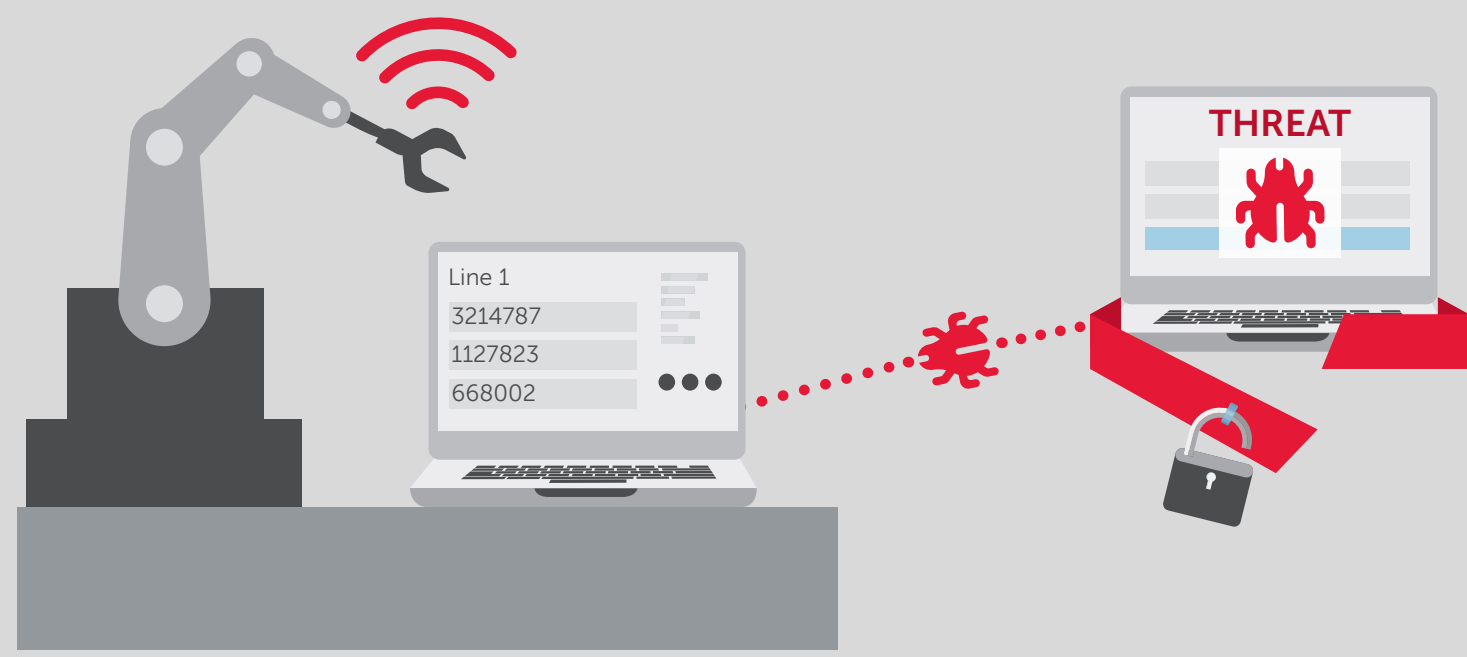

**\$1 MILLION**

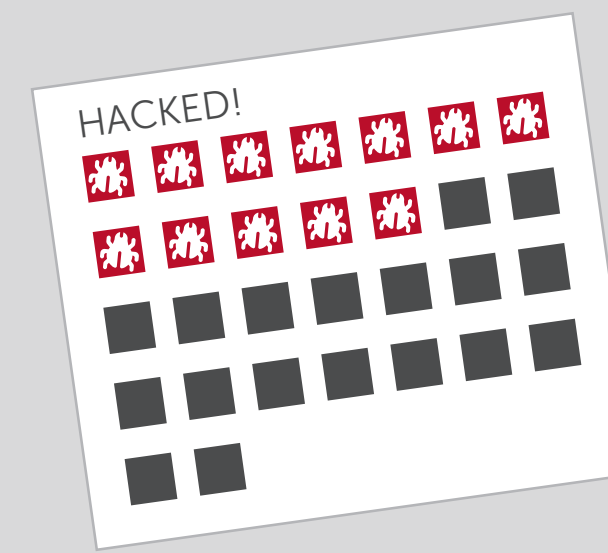

38% of breached manufacturers suffered damages in excess of \$1 million.<sup>2</sup>

31% of manufacturers have never performed vulnerability testing for industrial control systems.<sup>5</sup>

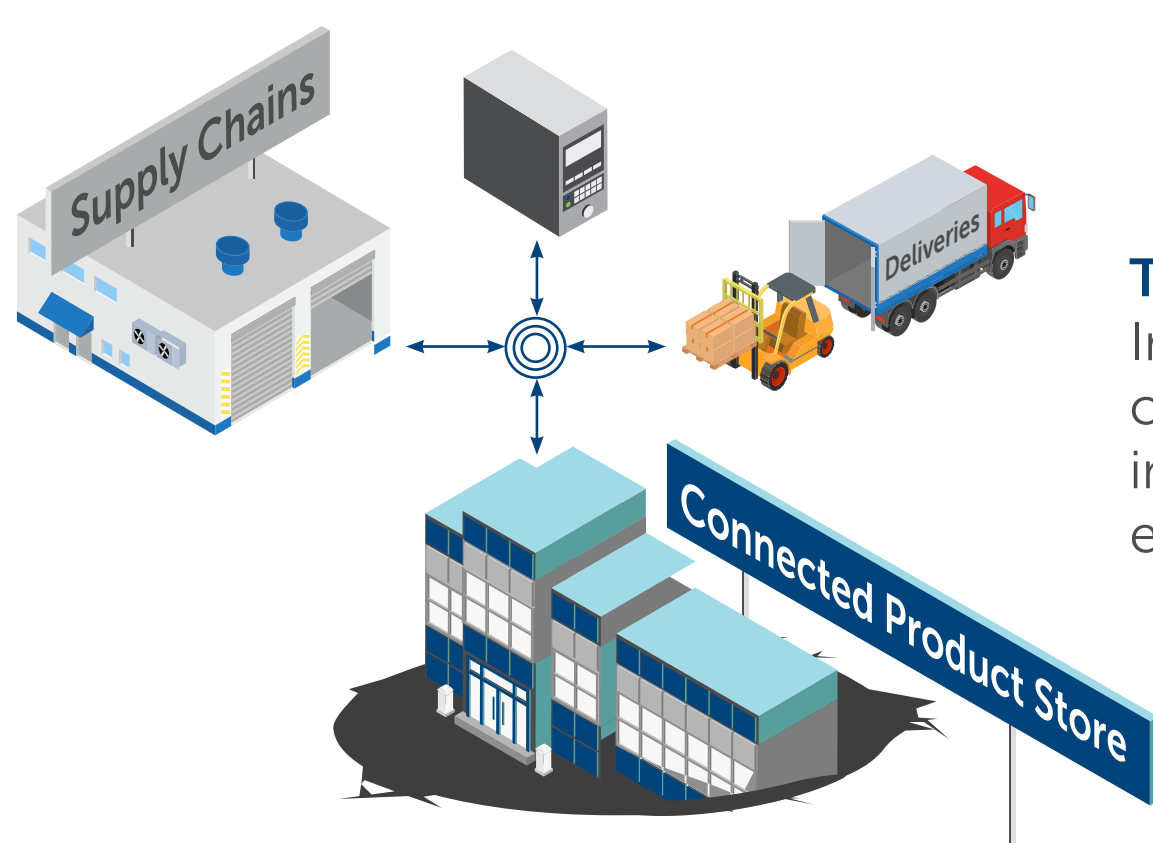

15% of manufacturing breaches originated from vendors and business partners.<sup>4</sup>

39% of manufacturers experienced a breach in the last 12 months.<sup>1</sup>

## Where are YOUR security holes?

### Third-Party Connections

Inventory management system, environmental control providers, software vendors' remote access, independent contractors, industrial manufacturing equipment, sensor controls

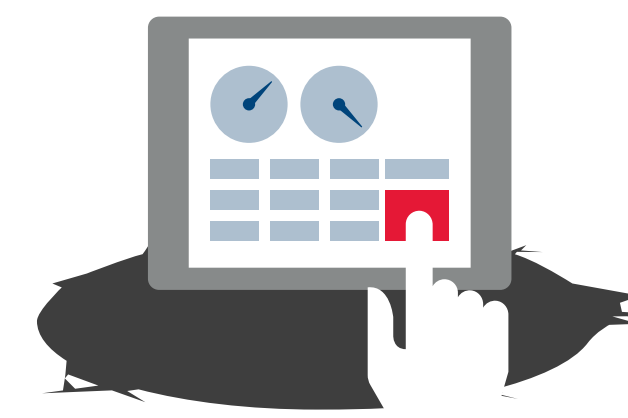

### Computers and Web Apps

Servers, web applications, workstations, laptops, BYOD

### Emails

Malicious links, malicious attachments

### Internal Employees

Phishing/pharming, using mobile devices, stealing intellectual property, abusing information technology systems

## WHAT to do?

Conduct a RISK ASSESSMENT.

ENSURE your network and endpoints are being monitored 24x7.

Deploy ADVANCED THREAT DETECTION to workstations, laptops and servers.

DEVELOP, PRACTICE AND ANNUALLY REVIEW your incident response plan and tabletop exercises.

PLUG YOUR HOLES WITH SECUREWORKS
